

Jobs and careers

You are a student

In order to prepare for your transition into employment, the UPJV Department for Careers Guidance and Transition into Employment (DOIP) helps you to professionalise your career and your job search.

Do you need help to find an internship or a student job, to write your CV or cover letter, to prepare yourself for a job interview or selection ?

The guidance and career counsellors offer you :

Personalised appointments to optimise your CV and cover letter, and to practice your interview skills
Remote workshops via the UPJV's "Orientation/Integration toolbox", available via your ENT: writing your application, using social networks in your job search, etc.

As a UPJV student, you have access to the university's internship agreements via your Digital Workspace (ENT), whether for a compulsory internship as part of your year of study, or for an optional internship to discover a profession.

The UPJV's JOBTEASER platform (accessible from your ENT and the My UPJV app) ([links](#)) offers internship opportunities in our partner companies, video chats with recruiters, and numerous resources for discovering careers.

As a UPJV student, you can get involved in the life of the university while being paid.

The missions proposed: welcoming students, health relay, support for disabled people, support for success, cultural and sports activities, IT support, etc.

It is also possible to find a student job outside the UPJV: do not hesitate to contact the Department for Careers Guidance and Transition into Employment (DOIP) to receive help with this process.
